

Live for the Future ...

What we've learnt from communities within Winchester District so far...

Public transport to be accessible, affordable and available

Provide local jobs for local people to reduce commuting

Direct new development to the built up areas to safeguard the countryside

Protect existing natural habitats and create new ones

Traditional forms of housing

Encourage energy efficient/eco friendly development

All new development has access to facilities and services by means other than the car

Need for better footpaths and cycle routes – linking places

More affordable + low cost housing

Facilities to be provided at the same time as new development

Retain the character and appearance of the districts towns and villages
