

Statement of Consultation

Draft Supplementary Planning Document – Residential Parking Standards

This is appendix 2 to the report to Winchester City Council's Cabinet (Local Development Framework) Committee seeking adoption of the draft Supplementary Planning Document – Residential Parking Standards.

Following approval of the draft SPD by Portfolio Holder Decision Notice in February 2009, the document was subject to a six week period of public consultation for which ended on 9 April 2009. Those involved have included statutory consultees as well as Elected Members, Parish Councils, local stakeholders and members of the development industry and their advisors. The consultation documents were also made available to the wider public via the Council's website. A public notice of the consultation also went in the Hampshire Chronicle on the 26th February 2009. A total of 8 responses were received during the consultation period

The consultation responses and the Council's consideration of these are summarised at Appendix 3 to the report to Winchester City Council's Cabinet (Local Development Framework) Committee seeking adoption of the draft Supplementary Planning Document – Residential Parking Standards. Of the 8 responses received two were identical and these have been analysed and presented together.
