Subject: RE: Colden Common Village Design Statement 2012 DRAFT CONSULTATION - WILDLIFE (Specific Items 2 - part 2 of 4) MAP 1 BAP

Whilst the 1st draft of the CCVDS is very good I am concerned that not enough emphasis is made of the importance of The Village and surrounds to local flora and fauna. I have previously mentioned this to the VDS Group and provided them with a hard copy of the HBIC pack.

Most of the locals are well aware of the thriving wildlife but ensuring this is well documented or evidenced is a struggle.

In March 2012 I contacted the Hampshire Biodiversity Information Centre (HBIC) and they provided me with a comprehensive set of plans and data, this is important information and should be incorporated, at least in summary into the VDS perhaps within section 3 'The Natural Environment' which currently seems to exclusively deal with only the landscape features.

The HBIC information includes maps showing nearby SSSIs, SACs and important habitats, we could utilise these within some of the existing maps or a new map in the VDS.

Please note I was advised that:

- *The attached maps contain some areas with no designation. This may be due to the fact that we currently do not hold any ecological survey information on these areas of land. **It should not be taken to mean that there is no ecological interest present.***

It's clear from the wildlife we see on a daily basis in the village that we are an important 'crossroads' for many species transiting between more formally protected areas including the South Downs National Park. Considering simply the 'tight' village centre boundary in the VDS is not sufficient and does not place the green fields etc in full context. For example there have recently been a large number of bats roosting in Upper Moors Road identified by The Hampshire Bat Group, and logged by others on 'The Big Bat Map' part of this area is already identified in this documentation as a BAP Priority Habitat, as are many others. A number of Tree Preservation Orders (Hampshire Wildlife Trust have also carried out a number of wildlife and bat surveys along The Itchen Navigation which borders the Village, again useful information to put our position into context: <http://www.hwt.org.uk/pages/in-wildlife.html>

HBIC are aware that I was seeking this information for the VDS, they had not been asked for a Colden Common search before my enquiry. They are happy for the information to be used in the VDS but we will need to acknowledge their assistance and check copyright of maps etc prior to publication. My reference number 3452 should be used in communications with HBIC.

More supporting information is also available on the Natural England Website (again pointed out to VDS Group in March 2012) see my compiled final attachment "Natural England Colden Common", I don't believe the VDS currently reflects the area.

Colden Common also has an Environmental Group and Tree Warden, these demonstrate our commitment to the area, and this should be reflected in the CCVDS. I am led to believe that Woodpeckers will be making a more concerted effort in the future to ensure sightings are passed to the appropriate County Recorders.

I attach the full response from HBIC in it's entirety but for ease I have reproduced the covering letter below:

Our ref: HBIC/EJP/E35/5.1/3452

Date: 24 April 2012

Dear Mr Taylor,

RE: Ecological Data Search: Colden Common

Thank you for requesting information from us on 20 March 2012. Please find attached:

1. A map showing Sites of Special Scientific Interest (SSSIs) and Special Areas of Conservation (SACs) within your 1km area of interest. There are no other statutory designated sites within your search area other than those shown on the map attached.
2. A map showing Sites of Importance for Nature Conservation (SINCs) and sites that appear on the Hampshire Ancient Woodland Inventory (AWI) within your area of interest.
3. A table listing the SINCs within your area of interest and their qualifying criteria.
4. A table detailing any protected and notable species currently on the HBIC database found within the vicinity of Colden Common Parish within the last 15 years. Please note that quantities of '0' (zero) indicate that the species was 'present' but the number of individuals seen was not recorded.
5. A table listing the protected and notable species found within the vicinity of Colden Common Parish within the last 15 years, as a simple list.
6. An map showing BAP Priority Habitat information within your area of interest. Click here for the [BAP Habitats Legend](#)

Please note the following points:

- If you have problems viewing any of the links in this document please connect to the internet and try again. If this doesn't work please get in touch and we will email you the supporting documents you need.
 - The attached maps contain some areas with no designation. This may be due to the fact that we currently do not hold any ecological survey information on these areas of land. It should not be taken to mean that there is no ecological interest present.
 - The boundaries for statutory sites have been provided to HBIC, by Natural England (NE), as digital data. The digital data is indicative not definitive. Paper maps produced by NE at the time the sites were designated show the official site boundaries.
 - HBIC do not currently hold notable/protected species information for certain taxonomic groups. Details of contacts who may be able to assist you in providing the relevant information for Hampshire can be found here: [Hampshire County Recorders list](#)
 - The Hampshire Inventory of Ancient Woodland is a provisional inventory that was published in 1995 by Hampshire County Council on behalf of English Nature (as Natural England were previously known). Sites that appear on the Inventory are over 2 hectares and include ancient semi-natural woodland and ancient replanted woodland.
 - The location of species records are based on [Ordnance Survey National Grid References](#), click here to view an explanatory note on this system.
 - The data supplied to you is subject to our [Data Users Declaration](#) (click to view) which you read and agreed to when you submitted your data request form.
 - Our [Hampshire County Recorders](#) (click here to view details) would be very grateful for copies of any species records you make in Hampshire.
 - The [caveats and statuses of each BAP Priority Habitat](#) can be viewed by clicking on this link.
- If you require any further information or have any additional queries, please do not hesitate to contact me.

Yours sincerely

Lizzy Peat

Subject: RE: Colden Common Village Design Statement 2012 DRAFT CONSULTATION

Dear Mr Taylor,

Thank you for your comments on the draft Colden Common Village Design Statement. I acknowledge receipt of these and your indication that more detailed comments are to follow. These will be taken into account by the City Council's Local Development Framework Committee, along with others received, when it decides whether any changes are needed to the VDS before it is adopted.

Yours sincerely,

The Government Standard

Subject: Colden Common Village Design Statement 2012 DRAFT CONSULTATION

Dear Sir

The (much awaited) Colden Common Village Design Statement 2012 (CC VDS) in its current state is a disappointment. Whilst it paints an interesting historical picture of our rural village it lacks some clarity of purpose and more importantly accuracy of information and supporting evidence to protect The Village. For example The Environment Agency (EA) and Hampshire Biodiversity Information Centre (HBIC), other wildlife and countryside agencies had not previously been contacted with information requests. I obtained this sometime ago as a 'member of the public' whilst the CCVDS was in draft but this valuable information has not been incorporated.

There are also footpaths and Tree Preservation Orders missing from 'Map D' and other important views from 'Map C'.

22/11/2012

The document itself is very large to download and when printed there are issues with the shaded text boxes that make it hard to read, particularly page 3, 7 and 8. These technical issues will need attention before final issue.

I will provide more detailed comments and supporting information before the deadline of 17th September however I want to record at this stage that a major concern is the fact that the CCVDS seems to offer little hope of protection from more large scale development within **and around** the village boundaries. Developers will simply ride roughshod through CCVDS and expose the loopholes. I am equally concerned that the Winchester District Local Plan 2006 (WDLP2006) and supporting documents may be watered down in a similar way; at least WDLP2006 currently offers some inferred protection via area policy H3.

The village has seen aggressive tactics (they have been working on this proposal since at least 2010 and have been promoting actively this year) being employed by one developer for a valuable village open space that also forms an important green space that prevents more ribbon development. This Plot (Ref: 1874), mistakenly marked 'previously developed' on the Winchester District Strategic Housing Land Availability Assessment Nov 2011 is on Upper Moors Road and separates The Village from Highbridge Road. This is a large site adjoining the South Downs National Park and historic Brambridge Park/Garden. This particular area is not covered by CCVDS 'Planning Guidance Areas' even though it is described as being on one of the 'oldest thoroughfares' in the village'.

There seems nothing in the CCVDS to alert developers that a proposal to build the whole 20 year target of 250 homes, in one go, in one field will not be welcome. I'd estimate that nearly 200 people attended a Parish Council Meeting in March this year when this particular proposal was discussed and there is no doubt that this size of development is not appropriate in The Village. (see PC Minutes here:

<http://www.coldencommon.hants.gov.uk/ParishNews2005.html>)

It is also important that CCVDS consultation is well publicised, as far as I am aware it has only been circulated by email to those on the 'CommonView' e-mailing list but this is hardly all encompassing, I haven't yet seen any posters or flyers in The Village.

The consultation notice does not make it clear if comments on CCVDS will ultimately be available to other members of the public to view, please can you clarify as soon as possible?

Ian Taylor

Village Resident

Protected and Notable Species Records

Search Area: **Within Colden Common Parish**

Date: **24/04/2012**

HBIC Ref: **3452**

See this [Legislation Explanatory Document](#) for a document explaining notable species statuses and legislation.

HBIC has its own extensive database of habitat and higher plant data for the County. In addition, HBIC hold copies of datasets belonging to partner organisations. Through data exchange agreements with these organisations HBIC is provided with regular database updates and can supply species information on their behalf. HBIC currently holds copies of the following datasets:

- Botanical Society of the British Isles' (BSBI) vascular plant database for Hampshire
- Butterfly Conservation's butterfly and moth database for Hampshire
- Hampshire Ornithological Society (HOS) bird records
- Hampshire Bat Group (HBG) Records of bat roost visits and sightings
- Data administered by the Hampshire Wildlife Trust (HWT) on behalf of the species recording groups below:
 - Hampshire Amphibian and Reptile Group (HARG)
 - Hampshire Mammal Group (HMG) (excluding records for bats and badgers)
- UK Bees, Wasps and Ants Recording Society (BWARS) trial dataset records for Hampshire

It is important that these species recording groups (where relevant to the data provided) are acknowledged in any document produced by the data requester where data is incorporated into the document, as a matter of course.

The following are Protected and notable species records from the above datasets within the search area recorded in the last 15 years:

Taxon Name	Common Name	Status	Grid Ref.	Location	First Year	Last Year	No. of Records	Max Count
<i>Amphibians & Reptiles</i>								
<i>Anguis fragilis</i>	Slow-worm	UKBAP WCA_s5p91(t)	SU47992158	Colden Common: 66 Church Lane	2004	2004	1	1

<i>Micromys minutus</i>	Harvest Mouse	UKBAP HBAP	SU5021	Marwel Zoo	2002	2002	1	0

* Indicates some of these records are unconfirmed

Confidential records

HBIC holds a small number of records that are to be treated as confidential. Confidentiality can be for a variety of reasons and may relate to a whole site or only to specific species. These records may be withheld or released depending on the nature of the data request and in accordance with the Environmental Information Regulations 2004.

Sensitive species

A small number of species are considered as sensitive by the relevant specialist species recording groups and will be indicated as such on all lists. Species may be considered sensitive for a variety of reasons. Location details for these records will not be disclosed unless the relevant species recording group has given their permission. Grid references will be altered to give a less precise position. Contact HBIC if further information is needed on these records.

Further notes

- Records of species such as the Nationally Rare Box (*Buscus sempervirens*) may not appear on the list as there may be many records but their provenance is not known.
- The location names, where shown, are the originals given by the recorders and may not match any formal name for the location or other colloquial names by which the location may also be known.
- The grid references, where shown, are the originals given by the recorders and may indicate the specific location of the species, a central grid reference representing a larger survey area, or a grid square.
- Where species have been deemed as 'sensitive' by the relevant specialist species recording group the location name will not be shown and the grid reference will have been altered to give a less precise position specified by the species recording group.
- Many of the records have been supplied by specialist species recording groups. Whilst every reasonable effort is made to validate information supplied to the Hampshire Biodiversity Information Centre the accuracy or comprehensiveness of this information cannot be guaranteed.
- Records do not necessarily represent evidence of breeding at a site; please contact HBIC if further details are required for any of these records.

sharing information about Hampshire's wildlife

The Hampshire Biodiversity Information Centre Partnership includes local authorities, government agencies, wildlife charities and biological recording groups.

- Whilst a species may have been recorded at a site, this does not indicate that the species is still present. Equally, the absence of a species from a site does not signify that it is absent, only that it has not been recorded, that the site has not been surveyed for this species, or that HBIC has not been informed of its presence.
- Quantities of '0' (zero) indicate that the species was 'present' but the number of individuals seen was not recorded. Negative quantities correspond to the DAFOR scale (plus very rare and 'locally' criteria) as follows:
 - -1 = Dominant (DAFOR)
 - -2 = Abundant (DAFOR)
 - -3 = Frequent (DAFOR)
 - -4 = Occasional (DAFOR)
 - -5 = Rare (DAFOR)
 - -6 = Very Rare
 - -21 = Locally Dominant
 - -22 = Locally Abundant
 - -23 = Locally Frequent
- Negative quantities of '-7' (minus seven) indicates that the species was 'not found'. These records are not included in protected and notable species lists.
- Max_Count values of '0' (zero) indicate that none of the records had a positive quantity count and hence the highest count numerical value was '0' (indicating 'present'). Max_Count values of blank indicate that none of the records had a numerical count value and instead they all had frequency values (e.g. using the DAFOR scale).

Agri-environment Schemes Map

This map shows all land currently in Agri-environment Schemes, together with areas that are targeted for funding under Higher Level Stewardship (part of the Environmental Stewardship Scheme or ESS) - these are known as HLS Target Areas. These Schemes are publicly-funded and provide payments to farmers who, in return, agree to manage their land for the benefit of the environment. A range of different management activities will be undertaken under each of the Schemes listed in the map legend. You can click anywhere on the mainland to see which HLS Target Area you are viewing, and link from the listed features to the relevant Target Area Statement on the Natural England website. Outside of Target Areas, you will find Regional Themes, with links to Regional Theme Statements where you will find detailed information on the Regional priorities for HLS outside Target Areas.

You can also click on any of the agreements shown on the map and find out which Scheme that land is in. For Environmental Stewardship Scheme, Countryside Stewardship Scheme and Environmentally Sensitive Areas scheme agreements (which are all managed by Natural England), details are provided on who the agreement holder is, their location, the total area covered by the agreement, the total amount they will be paid over the lifetime of the agreement, the amount they have been paid to date, and the date the agreement is scheduled to end. Only Schemes that are visible on the map will be reported. All ESS and CSS agreements provide a link to a page on the Natural England website that provides further details about the scheme agreement options that apply, including a brief explanation of the environmental benefits.

Land that is in Agri-environment Schemes is NOT generally available for public access, except where access is specifically included as part of the agreement with the farmer, or it is conferred by legal right (e.g. Public Right of Way or Access land mapped under the Countryside and Rights of Way Act 2000) or by some other separate permission. Where an agreement does include the temporary provision of public access ("Permissive access"), this is shown on the map by a special symbol. An additional link is also provided from the agreement summary to the agreement's access details on the Natural England website. Whilst we make very effort to ensure that the information we provide on permissive scheme access is accurate and up-to-date, there may be occasions where the Natural England website does not hold details about permissive access for an agreement. Natural England will make every effort to ensure that any such errors are detected early and dealt with swiftly so that we continue to maintain an effective and valuable public service.

Vixen Tor, North Dartmoor SSSI, Peter Wakely

This map shows Sites of Special Scientific Interest (SSSIs). At more detailed (larger) scales it shows the SSSI Units that make up each SSSI and the boundaries of any SSSI Management Agreement. At small scales the SSSIs are shown as points, but as you zoom in closer you will see the site boundaries. At larger scales the SSSIs are also labelled with their names. SSSI Units are labelled with their Unit Number and Management Agreements are labelled with their Unique Identifier.

You can use the Information Tool to link to pages about each SSSI, each SSSI Unit, and each Natural Area.

This map shows internationally important Special Protection Areas (SPAs), Special Areas of Conservation (SACs) and Ramsar sites in England. At small scales these sites are shown as different symbols, but at larger scales the symbols are replaced with the site boundaries. These boundaries are labelled with the name of the site. International sites often coincide, so the map symbols have been carefully selected so that you can see where the different types overlap. If a site is a SAC, a SPA and a Ramsar site, the name of each designation will appear.

Biodiversity Action Plan Priority Habitats Map

The boundaries shown here are from the BAP priority habitat inventories published in 2004. To see the current boundaries please visit the [MAGIC website \(Terms of Use\)](#).

This map represents our best assessment of the distribution and extent (in England) of some of the Priority Habitats that are listed in the UK Biodiversity Action Plan, based on existing, nationally available, sources. These rare or threatened semi-natural habitats are the subject of concerted action by many different organisations involved in wildlife conservation. This information has been gathered using a standard method, and we intend to work in partnership with others to update and improve the data periodically. All the maps are at an early stage of development and are incomplete for some habitats; they should all be considered provisional. These data will be updated and new habitats added as soon as the information becomes available to Nature on the Map.

Please use the 'Contact Us' feedback form to tell us about any changes to the inventories which are needed. Please include the priority habitat, Unique parcel identifier or grid ref, the change that is needed and why. Including your email address will allow us to clarify any comments.

Use the Information Tool to see some of the information recorded about each site. You can learn more about BAP Priority Habitats from the [UKBAP website](#)

Geological Sites Map

Nature on the Map

The screenshot displays the 'Geological Sites Map' interface on the Natural England website. At the top, there is a search bar with the text 'Search map for English postcodes, places, sites and more...' and a 'Go' button. Below the search bar, a navigation menu includes 'HOME', 'MAPS', and 'HELP'. The main map area shows a detailed view of a rural landscape with various geological features and sites. A sidebar on the left lists several categories of sites, with 'Geological Sites Map' currently selected. A key on the right side of the map explains the symbols used, including 'Geological descriptions', 'Geological SSSIs', 'Selected Sites of Special Scientific Interest', 'Sites of Special Scientific Interest', 'Natural England Regions', 'Scotland, Wales and Ireland', 'Ordnance Survey background mapping', and 'England'. An inset image of Lulworth Cove is shown in the bottom left corner.

© Crown Copyright and database right 2012. Ordnance Survey Licence number 100022021. © Crown copyright. Licence number 100022432.

This map shows geological and geomorphological Sites of Special Scientific Interest (SSSIs). At small scales the SSSIs are shown as red stars, but as you zoom in closer you will see the site boundaries. At larger scales the SSSIs are also labelled with their names.

It also shows Local Geological Sites. These are represented on the map by blue-green circles. One Spotlight Local Geological Site has been identified in each county; these are shown in greater detail.

The map is divided into areas (broadly similar to county boundaries) for each of which a general geological description is given. Also indicated are a selection of places you can visit which show, in part, the diversity of England's geology.

You can use the Information Tool to link to pages about each SSSI, and each Natural Area.
