Proposal: The works comprise the replacement of the sagging timber beams and associated finishes internally together with renewal of the roof coverings to the single story lean-to and pitched roof structures. This element of work involves replacing the roof coverings with grey textured slate covering to match existing and lining the valley gutters. For the lean-to roof, this will also involve removing the aluminium composite rafters and lightweight timber frame forming this retrofit lean-to roof structure/covering and it is proposed to reinstate with a traditional timber cut-lean-to roof structure to accommodate the slate covering. The ridge tiles on the pitched structure will be renewed in clay to match existing.

Proposal: Line of small trees/shrubs as detailed in diagram (G1) consisting of mixed species including Laurel, Cherry plumb and Birch which need to be pruned back to boundary whilst maintaining suitable growth points on the trees. They trees are intruding upon the drive space of the property hence the application to prune back from the drive. (T2) is one Catalpa Bignonioides in the rear of the property, which had some form of rope/wire wrapped low around the base of the stem a couple of years ago by builders. The wire cut through the cambium and has caused decay inside the stem, which is deep enough to cause concern for the owner that it may be compromised. There is another tree of the same species in the other side of the garden which is much healthier and sin't showing signs of crown die back like this one is. The owners are happy to replant in the same area should the tree be removed.

Proposal: We would like to remove the white oak from our front garden asap as it is dying and dangerous. Its leaves start to dye from end June and many of the branches remain dead all year round. Some of these have fallen next door in number 11 and some in our front garden. We are very concerned that there could be an accident. The tree has been unwell for years and now got noticeably worse. A tree inspector (Ivan) came round to look at the tree on 14 December and confirmed all the above. I have been liaising with Claire Jakeman (Technician - Landscape and Open Spaces) and sent over photographic evidence. She confirmed I now just need to fill in this application form so I can be sent a notice to display.

The tree overhangs properties on Silwood Close and the canopy encroaches the garden by over 50% of the usable garden space. It is unacceptable that someone should lose the enjoyment of their garden due to a neighbouring tree.
