Proposal: Cherry tree (T1) - fell because of root system which is partially above ground and has travelled under my drive . The roots have lifted causing damage to the drive , access road and is undermining partion boundary wall.

I do not feel it would be suitable to replant another tree because the existing tree trunk will be ground down only and the existing complex root system which travels at least six foot radius will remain. Therefore not allowing room for another tree. There is also a very large Birch tree already on the boundary between my neighbour and myself.
