

## **The Winchester Historic Environment Record Access and Charging Policy**

### **1. Introduction**

#### **Content of the Historic Environment Record:**

Winchester City Council maintains the Winchester Historic Environment Record (HER), the primary source of information about the historic environment for the historic city and district of Winchester and the former part of Winchester district that lies within the South Downs National Park. It includes a database that contains information about remains from the Palaeolithic through to the present day. Information on nationally designated (conservation areas, listed buildings, registered battlefields, registered parks and gardens and scheduled monuments), locally designated and undesignated heritage assets. Records cover buildings and other structures, earthworks, landscape features, natural features and buried remains. The HER incorporates and continues to update the Winchester Urban Archaeological Database, originally compiled between 1997 and 1999, and is supported by a range of additional material including a small library, unpublished archaeological reports, historic maps and aerial photographs.

#### **Mapped Data**

The HER database is linked to a series of digital maps held as Geographic Information System (GIS) files. The maps contain geographical depictions of all sites on the database, ranging from simple point locations to complex plots of extensive sites. Maps provided from the HER GIS are for information purposes only. Due to Ordnance Survey copyright restrictions this mapping must not be reproduced in researcher's own reports.

#### **How do I access the HER?**

The HER is based at the city council offices in Colebrook Street, Winchester. You can obtain information from the HER in a number of different ways, such as by letter, email or by submitting an online enquiry form.

Summary information of HER Monument Records (buildings, find spots and monuments) is available on the Heritage Gateway ([www.heritagegateway.org.uk](http://www.heritagegateway.org.uk)). However, as this data only includes summary

information from one dataset within the HER and is updated only periodically, it is not suitable for commercial enquiries.

### **Opening times / facilities**

The HER operates Monday – Friday, 9am – 4pm and whilst supporting documentation, for example, such as aerial photographs and unpublished reports can be made available at the city council offices by appointment, HER searches are large undertaken remotely and the results emailed or posted out.

Please note that unpublished archaeological reports held only in hard copy format are currently held in an off-site storage location and retrieval may take several days.

### **Searching the HER**

HER searches provide information selected from the record, normally for a defined area, although bespoke searches can also be undertaken for particular periods or types of asset; these bespoke searches are often undertaken for research purposes. The HER includes both digital and hard copy information and acts as a signpost to other information sources held outside the HER. It is constantly being enhanced and the absence of a record should not be relied upon as indicating a lack of heritage interest; other national or specialist sources may contain information not held or indexed or indeed any given area may contain currently unknown heritage assets.
