**Applicant:** Elm Road (Winchester) Ltd

**Proposal:** One tree, a Rowan (1) previously identified as declining and of poor quality has continued to dieback and is now over 50% dead and clearly extensively colonized by decay fungi. Although a fairly small tree (<125mm stem diameter) its situation is close to the boundary wall and partly overhanging the adjacent public footpath now render this tree as increasingly potentially hazardous. As such it should now be removed.

Action: fell

There is also a small group of self-set Ash saplings in this corner of the grounds, which show symptoms of Ash dieback disease and these stems should now be cut to ground level.

Action: fell
