## 1. Introduction

### What is a Strategic Housing and Employment Land Availability Assessment (SHELAA)?

- 1.1 The SHELAA is a register of the sites that the council has been advised by developers and landowners **could be** potentially available for development. Sites included in the SHELAA result from a “call for sites” which was open to all and widely publicised. The latest call for sites was open between 15 February and 12 April 2021. In addition, all sites in the 2020 published SHELAA were rolled forward into this updated 2021 SHELAA and reassessed unless a request was received to withdraw the site.
- 1.2 The SHELAA is a register of sites which have been submitted to the council. It does **NOT** allocate sites for development. The inclusion of the site in the SHELAA does not imply that the council would necessarily grant planning permission.
- 1.3 This updated SHELAA (2021) forms an important part of the evidence base that will help to inform the preparation of the new Local Plan. Its purpose is to enable realistic assumptions to be made about how much housing and employment space could potentially come forward on sites that are suitable, available and achievable to meet the council’s housing and employment needs.
- 1.4 The 2021 Call for Sites differed from previous ones in that it also invited the submission of sites which could be suitable, available and achievable to meet the needs of Biodiversity Net Gain and Offsetting, Green Infrastructure, Carbon Offsetting, Nitrogen Offsetting, Renewable Energy generation and for brownfield land. Sites submitted for these purposes are not included in this SHELAA, as the SHELAA focuses upon land available for residential or employment uses. These ‘green sites’ will instead be considered and included in a separate green sites register.
- 1.5 The SHELAA has been prepared in accordance with the National Planning Practice Guidance (Housing and Economic Land Availability Assessment (Section ID3)).

### What area does the SHELAA cover?

- 1.6 This SHELAA only covers the part of Winchester district that is outside of the South Downs National Park, as the South Downs National Park Authority is responsible for preparing its own Strategic Housing and Employment Land Availability Assessment. Figure 1 below details the area of Winchester District which is within the South Downs National Park

Figure 1 *Winchester District Area, and South Downs National Park boundary.*

## 2. Policy Context

### National Planning Policy Framework

- 2.1 The National Planning Policy Framework (NPPF) states that Local Planning Authorities should have a clear understanding of available land in their area through the preparation of a SHELAA to establish realistic assumptions about the suitability, availability and the economic viability of land to meet the identified need for housing and employment land over the plan period.
- 2.2 In accordance with the NPPF, the council has undertaken and updated a SHELAA to inform the council's Local Plan Review process. The NPPF also requires the council to identify and update annually a supply of specific deliverable sites sufficient to provide five years' worth of their housing requirements (with an additional buffer of 5% or 20%, moved forward from later in the plan period, if required) - as well as identify a

supply of specific developable sites or broad locations for growth for years 6-10 and where possible, for years 11-15. This is set out in the council's Authorities' Monitoring Report which is updated in December each year.

<https://www.winchester.gov.uk/planning-policy/monitoring-and-other-planning-documents/annual-monitoring-report-amr>

- 2.3 The NPPF (para 70) acknowledges that Local Planning Authorities may make an allowance for windfall sites in the five year housing land supply if there is compelling evidence that such sites will continue to provide a reliable source of supply. Any windfall allowance should have regard to the SHELAA, historic windfall delivery rates and expected future trends, and consideration should be given to policies to resist development of residential gardens.

### **Planning Practice Guidance**

- 2.4 The Government's Planning Practice Guidance (PPG) provides guidance on housing and economic land availability assessment and, in relation to potential housing land, sets out a methodology to identify a future supply of land which is suitable, available and achievable for housing over the plan period. This SHELAA has been undertaken in the context of the latest guidance contained in PPG updated in July 2019.

### **3. Methodology**

- 3.1 This SHELAA 2021 is the latest iteration of a number of land availability studies undertaken by the council over the last 20 years or so.
- 3.2 The SHELAA has been drafted in accordance with the methodology set out in PPG in Figure 2. The council also consulted with stakeholders on the methodology for the SHELAA and has taken the results into account in refining the methodology and undertaking the assessment.
- 3.3 The following chapters set out the work undertaken at each stage of the SHELAA and the Housing Land Supply section considers the various sources of expected housing provision.

**Stage 1 - Site / broad location identification**

**Stage 2 - Site / broad location assessment**

**Stage 3 - Windfall assessment**

**Stage 4 - Assessment review**

**Stage 5 - Final evidence base**

No

**Figure 2 Housing and Economic Land Availability Assessment-Methodology Flowchart (Planning Practice Guidance 2019)**

#### 4. Stage 1: Identification of sites and broad locations

##### Determine assessment area and site size

- 4.1 The PPG indicates that the area selected for assessment should be based on the housing market area and functional economic market area - this could be the local planning authority area or an alternative area.
- 4.2 The Strategic Housing Market Assessment ('SHMA') for Winchester District (Iceni Project Ltd, February 2020) identifies three housing 'sub-markets' in the district, (each of which demonstrates different characteristics). The information in this SHELAA report has been organised according to parish council boundaries, which in general align with the three housing sub-markets as follows:

Table 1 **Housing Sub-Market Areas of Winchester District (SHMA 2020)**

Housing Market – Sub Market Area	Parishes in this Sub Market Area
Northern Sub Market Area	Wonston, Micheldever, Northington, South Wonston, Crawley, Sparsholt, Littleton & Harestock, Headbourne Worthy, Kings Worthy, Itchen Valley, Itchen Stoke & Ovington, Old Alresford, New Alresford, Bighton, Bishops Sutton, Hursley, Olivers Battery, Compton & Shawford, Colden Common, Owslebury, Upham, Bishops Waltham (part)
Southern Sub Market Area	Durley, Curdridge, Whiteley, Wickham, Shedfield, Swanmore, Bishops Waltham (part), Boarhunt, Southwick & Widley, Denmead, Soberton (however areas in SDNP park are in Northern Sub Market area).
Winchester Town Sub Market Area	Winchester Town Parishes including Badger Farm

- 4.3 In accordance with Government guidance, this SHELAA relates only to the Winchester district, and to land outside the South Downs National Park boundary. In some circumstances sites have been submitted both to Winchester and a neighbouring local

authority. In these instances this SHELAA only assesses sites within the planning administrative area.

- 4.4 An initial assessment of the SHELAA sites has been undertaken by planning officers in the Strategic Planning team, other specialised officers from within the council and with the assistance of Hampshire Council County and an external Consultant who have all provided advice and information as necessary.
- 4.5 The PPG encourages plan makers to assess a range of different site sizes from small-scale sites to opportunities for large-scale developments such as village and town extensions and new settlements where appropriate. Paragraph 69 of the NPPF recognises the important contribution that small and medium sized sites can make to meeting local housing requirements and that they are often built out quickly. Local authorities are required to identify land to accommodate at least 10% of their housing target on site no larger than 1ha unless it can be shown that there are strong reasons why this target cannot be achieved. Appendix Three provides a schedule of all sites of less than or equal to 1ha included in the SHELAA, along with the site area and development capacity.

#### **Desktop Review of Existing Information**

- 4.6 Experience over the years has indicated that typically sites identified through sources such as desktop reviews (e.g. from aerial photography, GIS and the former UCS) are less likely to be developed than those promoted by landowners through the call for sites. Therefore, the only sites that are included in this SHELAA as a result of desktop review are those from the 'Brownfield Register' (sites DE36, KW12, WIN12). This is consistent with Government advice and adopted planning policy in LPP1, which give priority to the development of previously developed land - in particular vacant and derelict sites and buildings.

#### **Call for Sites/Broad Locations**

- 4.7 The council undertook a call for sites exercise between 15 February to 12 April 2021. The call for sites was promoted on the planning policy pages of the council's website along with a new standalone website for the new Local Plan. A consultation regarding Strategic Issues and Priorities for the Local Plan was undertaken at the same time as the Call for Sites and this was widely promoted through social media advertising, posters on noticeboards across the district, and bus stop advertising in Winchester Town. Details of the Local Plan consultation and Call for Sites was included as an item in e-bulletins.
- 4.8 Sites which were included in the published 2020 SHELAA were rolled forward for inclusion and assessment in this updated 2021 SHELAA unless the council received a request to remove individual sites.
- 4.9 The Call for sites asked for sites to be submitted online via Citizen space which hosted a form with various questions for the site promotor to answer about the land

being submitted. The answers to the questions help assess the suitability, achievability and viability of the promoted sites.

- Site Capacity (number of dwellings and/or amount of employment/retail/leisure floor space in square metres)
- Site Constraints (what constraints are there to development, what is needed to overcome there and how long might this take)
- Availability (is the site currently available and proposed for development, if not when would it likely be available, is there interest from a developer)
- Time Period (when the site could be brought forward and the likely completion rate (1-5 years, 6-10, or 11-15))
- Map/Site Plan (to identify the site and to confirm the boundaries)

4.10 The full questionnaire and information provided has been used to inform an initial site assessment and these are presented in a standard template format with an accompanying site location plan (Appendix A).

#### **Site/Broad Location Survey**

4.11 All of the sites that were put forward as part of the call for sites were plotted on a Geographical Information System (GIS) so that any constraints could be easily identified, and the range of options in particular settlements could be viewed in context.

### **5. Stage 2: Site/broad location assessment**

5.1 Stage 2 of the process (Site/ Broad Location Assessment) involves the following steps and considerations:

- Estimating the development potential of each site
- Assessment of suitability
- Assessment of Availability
- Assessment of Achievability (including viability); and
- Overcoming Constraints

#### **Estimating the development potential of each site**

5.2 An estimated development density has been calculated for each site based on the net developable area. This density differs depending on the location (as set out below) to take account of the diverse nature of the settlements and land supply across the

district. The PPG states that the estimates should be guided by existing or emerging plan policy. Whilst the 2006 Local Plan Review policy on density (H7) is no longer saved, the densities referred to provide a useful guide for the initial assessment. Other local authorities have used different densities depending on the site location (distance to services) and characteristics of the surrounding area, or have used exemplar sites as examples of densities they would wish to achieve.

- 5.3 The following average densities were applied to the sites based on the settlement hierarchy of LPP1. The estimated densities for sites in Colden Common, Denmead, Kings Worthy, Swanmore, Waltham Chase and Wickham were reduced from 40 dwellings per hectare to 30 to reflect the general character of these settlements. These densities were applied to all sites, except in a small number of cases where site specific information indicated that an alternative density was more realistic.

Table 2 **Average densities used for sites in the district**

Location of site		Estimated density dwellings per Hectare
Winchester Town and Whiteley	Town Centre (Policy DM7 area)	75
	Within 100m of town centre	50
	Elsewhere within the settlement	40
Bishops Waltham and New Alresford	Town/Village Centre (Policy DM7 area)	50
	Elsewhere within and outside the settlement	40
Colden Common, Denmead, Kings Worthy, Swanmore, Waltham Chase, Wickham	Within the settlement	30
All other settlements	Within the settlement	30
Outside remaining settlement boundaries	Outside any settlement	30

- 5.4 The resulting housing estimates for the sites were then refined further by using a density multiplier recommended by URBED (“Tapping the Potential: Best Practice in Assessing Urban Housing Capacity”, 1999, The Urban and Economic Development Group) to produce a more accurate estimate of the housing capacity for each site. The density multiplier (shown in Table 3 below) accounts for the requirement for infrastructure and open space, which increases with the size of the site, therefore a larger site is more likely to require more land to be used for open space, for example.

Table 3 **Density Matrix based on URBED estimations**

Site Area (Ha)	0 - 0.4	0.4 - 1	1 - 1.5	1.5 - 2	2 - 4	4 - 6	6 - 8	8 - ∞+
----------------	---------	---------	---------	---------	-------	-------	-------	--------

Density multiplier	1	0.9	0.8	0.75	0.65	0.6	0.55	0.5
--------------------	---	-----	-----	------	------	-----	------	-----

5.5 The stakeholder consultation that took place between July and September 2018 on the SHELAA methodology included questions on density assumptions, which revealed some criticism of the use of blanket density assumptions, but there were conflicting views on appropriate density levels, particularly in rural areas. Work on preparation of Local Plan Part 2 during 2012/14 confirmed that the existing density estimates produced a good starting point for estimating the density of sites that were taken forward as Local Plan allocations. Given that this is only an initial assessment of the sites and a detailed assessment will in time be undertaken, this broad assessment of potential density is considered appropriate at this stage. If a site is considered to be suitable for future allocation a more detailed assessment will be undertaken taking into account any constraints and the character of the area.

### **Assessing suitability for housing**

5.6 When assessing the sites against the adopted development plan, the PPG advises the need to take account of how up to date the plan policies are and consider the appropriateness of identified constraints on sites/broad location and whether such constraints could be overcome.

5.7 In addition to the above considerations, the following factors should be considered to assess a site's suitability for development now or in the future:

- physical limitations or problems such as access, infrastructure, ground conditions, flood risk, hazardous risks, pollution or contamination;
- potential impacts including the effect upon landscapes including landscape features, nature and heritage conservation;
- appropriateness and likely market attractiveness for the type of development proposed;
- contribution to regeneration priority areas;
- environmental/amenity impacts experienced by would be occupiers and neighbouring areas.

5.8 An initial assessment of each site's suitability for development has been made. Sites have been scored using a 'Red/Amber/Green ('RAG') rating system as set out below in Table 4.

5.9 It is important to reiterate that this is only a high level initial assessment as a result of this if a site has received a 'Red' in one box for example, a site is located in a Conservation Area, this does not mean that it is impossible to achieve development when a more finer grained analysis is undertaken. In a similar vein, at this stage of the process, as this is only a high level initial assessment under the heading 'Policy' there are only two criteria (Amber and Green) as the very nature of the SHELAA means that sites have been put forward that are in for example, located in the countryside so there is no 'Red' score.

Table 4 Initial Suitability Assessment Criteria

Constraint	Criteria	Score
<b>Natural Environment</b>		
Special Protection Areas (SPA)	Site is wholly or largely within SPA	Red
	Site is adjacent or partially within	Amber
	Site is not adjacent or within	Green
Special Areas of Conservation (SAC)	Site is wholly or largely within SAC	Red
	Site is adjacent or partially within	Amber
	Site is not adjacent or within	Green
Sites of Special Scientific Interest (SSSI)	Site is wholly or largely within SSSI	Red
	Site is adjacent or partially within	Amber
	Site is not adjacent or within	Green
Ramsar Sites	Site is wholly or largely within Ramsar Sites	Red
	Site is adjacent or partially within	Amber
	Site is not adjacent or within	Green
Sites of Importance for Nature Conservation (SINCs)	Site is wholly or largely within SINC	Red
	Site is adjacent or partially within	Amber
	Site is not adjacent or within	Green
National Nature Reserve (NNR)	Site is wholly or largely within NNR	Red
	Site is adjacent or partially within	Amber
	Site is not adjacent or within	Green
Local Nature Reserve (LNR)	Site is wholly or largely within LNR	Red

	Site is adjacent or partially within	Amber
	Site is not adjacent or within	Green
Ancient Woodland	Site is wholly or largely within Ancient Woodland	Red
	Site is adjacent or partially within	Amber
	Site is not adjacent or within	Green
Tree Preservation Orders/ Areas	Site is wholly or largely covered by TPO/ Areas	Red
	Site is adjacent or partially covered by TPOs	Amber
	Site is not adjacent or covered by TPOs	Green
<b>Historic Environment</b>		
Sites on the English Heritage Register of Historic Parks & Gardens	Site is wholly or largely within Historic Park & Garden within	Red
	Site is adjacent or partially within	Amber
	Site is not adjacent or within	Green
Listed Buildings/Heritage Assets	Site is wholly within area of Listed Buildings/ Heritage Assets	Red
	Site is adjacent or partially within	Amber
	Site is not adjacent or within	Green
Conservation Areas	Site is wholly or largely within Conservation Area	Red
	Site is adjacent or partially within	Amber
	Site is not adjacent or within	Green
Area of High Archaeological Potential	Site is wholly or largely within Area of High Archaeological Potential	Red
	Site is adjacent or partially within	Amber
	Site is not adjacent or within	Green
Historic Battlefields	Site is wholly or largely within Historic Battlefield	Red
	Site is adjacent or partially within	Amber
	Site is not adjacent or within	Green
Scheduled Ancient Monuments	Site wholly or largely covered by Scheduled Ancient Monument	Red
	Site is adjacent or partially within	Amber
	Site is not adjacent or within	Green
<b>Flooding</b>		

Flood Zone 2	Site is wholly or largely within Flood Zone 2	Red
	Site is adjacent or partially within	Amber
	Site is not adjacent or within	Green
Flood Zone 3	Site is wholly or largely within Flood Zone 3	Red
	Site is adjacent or partially within	Amber
	Site is not adjacent or within	Green
<b>Policy</b>		
Countryside (MTRA4)	Site is not within the defined Settlement Boundary	Amber
	Site is within defined Settlement Boundary	Green
Air Quality Management Area (AQMA)	Site is adjacent or within the AQMA	Amber
	Site is not adjacent or within AQMA	Green
Settlement Gap (CP18)	Site is adjacent or within the Settlement Gap	Amber
	Site is not adjacent or within Settlement Gap	Green
Designated Open Space (DM5)	Site is within a Designated Open Space	Amber
	Site is not within a Designated Open Space	Green
Mineral Safeguarding Area	Site is within a Mineral Safeguarding Area	Amber
	Site is not within a Mineral Safeguarding Area	Green
Waste Consultation Zone	Site is within a Waste Consultation Zone	Amber
	Site is not within a Waste Consultation Zone	Green

5.10 In accordance with advice in the PPG (Paragraph: 018 Reference ID: 3-018-20190722), sites located wholly or largely within any one of the following designations score red:

- Ancient Woodland
- Sites of Importance for Nature Conservation (SINCs)
- Sites of Special Scientific Interest (SSSI)
- Special Protection Areas (SPA)
- Special Areas of Conservation (SAC)

- Ramsar Sites
- Local Nature Reserve (LNR)
- National Nature Reserve (NNR)
- Scheduled Ancient Monuments
- Sites on the English Heritage Register of Historic Parks and Gardens
- Historic Battlefields

**Ecological Buffer Zones:**

5.11 Utilising data from the Hampshire Biodiversity Information Centre (HBIC) the sites have been assessed to identify whether they are in proximity to sensitive habitats and/or European protected species records. All sites located within the following buffer zones have scored amber for “ecological buffers’ indicating the need for further assessment and possible mitigation. Refer to Appendix Five for details of sites falling within these buffer zones.

**Table 5 Ecological Buffer Zones – Initial Assessment Criteria**

Statutory Sites (LNR, NNR, National Parks, Ramsar, SSSI, SPA, SAC)	1km	Amber
Non Statutory Sites (SINCs and Solent Waders and Brent Goose Strategy Sites)	500m	Amber
HBIC Priority Habitats	200m	Amber
European Protected Species records	100m/200m	Amber
Moving and Static Water	100m	Amber

**Landscape Appraisal:**

5.12 An initial desk based assessment is being undertaken by the council’s landscape team to identify whether or not sites are likely to be landscape sensitive.

**Table 6 Landscape Appraisal – Initial Assessment Criteria**

Site likely to be landscape sensitive	Amber
Site not likely to be landscape sensitive	Green

**Highways and Access**

5.13 An initial high level desk based assessment is being undertaken to identify whether there is access from the site to the main highway, location of the site to a bus stop, local shops and facilities, and local primary schools. Based on these considerations, each site has been given an overall accessibility ranking of less than 800m was 'Green' and greater than 800m was 'Amber'.

**Table 7 Highways and Access – Initial Assessment Criteria**

Greater than 800m	Amber
Less than 800m	Green

**Archaeological Assessment:**

5.14 All of the sites have been assessed to provide an initial indication of the level of archaeological harm that may be caused. Assessments considered both the potential for harm to the asset itself and to its setting. This assessment considered whether:

- there are any designated or non-designated heritage assets within or adjacent /close to their boundaries;
- the site has the potential for currently unknown archaeology; and
- there might be other archaeological issues and opportunities.

**Table 8 Archaeological Assessment – Initial Assessment Criteria**

Development of the site is likely to result in harm to/on the significance/setting of a scheduled monument, or;  Development will result in substantial harm to/on the setting of a non-designated heritage asset(s) and it is unlikely that impacts can be mitigated.	Red
Development of the site may result in substantial harm to/on the significance/setting of a non-designated heritage asset(s). Constraints may mean that the allocation can only be partially delivered / is problematic or, that mitigation may be so burdensome as to affect the deliverability of the allocation.	Amber
Development of the site may result in less than substantial harm to/on the significance/setting of a scheduled monument; a non-designated heritage asset.  It is likely that impacts can be mitigated.	Green
Development of the site is likely to result in minimal or no impact to/on the significance/setting of a scheduled monument; a non-designated heritage asset.	White

It is likely that no mitigation is required as there is no impacts.	
---	--

**Built Heritage:**

5.15 In addition to the initial assessment of potential built heritage impacts identified above, a further high level assessment of potential impacts on heritage assets and their settings has been undertaken, including consideration of whether it might be possible to mitigate adverse impacts. The criteria and RAG rating are provided below.

**Table 9: Built Heritage Initial Appraisal Criteria**

Development of the site is likely to lead to substantial harm to a designated heritage asset and/or its setting which it would not be possible to mitigate. The site will not be taken forward for further consideration at this stage	Red
Development of the site is likely to lead to less than substantial harm to a designated heritage asset and/or its setting but it is likely that these impacts can be adequately mitigated. The site will be taken forward for further consideration in the SHELAA with the proviso that further work will be required which could include a desk based historic environment assessment and where necessary a field evaluation. The site could still be ruled out, as being unsuitable for development.	Amber
Development of the site is likely to lead to no harm to a designated heritage asset and/ or its setting and in such cases it is possible that no mitigation will be required. A green rating will also apply to sites where there are no identified designated heritage assets either on or adjacent to the site.	Green

**Next Steps**

5.16 Once all of the initial suitability assessments identified above have been completed, an updated SHELAA report will be published, with a summary score for each site and all of the Site Assessment Summarises in Appendix Two completed. The Updated SHELAA will be used alongside the Development Strategy for the new Local Plan.

**Assessing the availability for development**

5.17 The PPG states that a site is considered available for development:

*“when on the best information available, (confirmed by the call for sites and information from landowners and legal searches where appropriate) there is confidence that there are no legal or ownership problems, ransom strips, tenancies or operational requirements of landowners. This will often mean that the land is controlled by a developer or landowner who has expressed an intention to develop or the landowner has expressed an intention to sell.”*

- 5.18 When assessing whether a site is available for development consideration needs to be given to the delivery record of the developers or landowners putting forward sites, and whether the planning background of a site shows a history of unimplemented permissions. A site which benefits from planning permission will not automatically be assumed to be available as people who do not have an interest in the land can submit planning applications.
- 5.19 One of the questions in the call for sites asked site promoters to confirm whether they own the site/ have landowner consent to promote it for development, and estimate when it will be available for development.
- 5.20 Subject to Cabinet approving the publication of the SHELAA, discussions will be held with the Parish Councils for those sites that meet the councils preferred development strategy and the owners of sites that have passed initial assessment of suitability for development will be contacted and asked to demonstrate that the site is within their land ownership and to confirm further information such as when the site would come forward, if there is any developer interest in the site etc. Those sites with any restrictions will have this noted in the sites constraints.

### **Assessing achievability - including economic viability**

- 5.21 An achievable site is one where there is a reasonable prospect that the particular proposal will be developed on the site at a particular point in time. This includes a judgement about the economic viability of a site (taking into consideration whether there are any constraints on the site), and the capacity of the developer to complete, let or sell the development over a certain period.
- 5.22 The Call for sites process asked about issues affecting achievability and viability, a summary of which is provided in the site assessments in Appendix Two. This information will be further utilised in the next stage of the more detailed assessment of sites.

### **Overcoming constraints**

- 5.23 For all sites, the constraints were identified from GIS information provided by other agencies and the council's policy maps. As part of the initial sieving exercise, consideration is being given to the existence of constraints to development and whether there is a reasonable expectation that these could be overcome/ adverse effects mitigated.

## **6. Stage 3: Windfall Assessment**

- 6.1 The PPG indicates that the housing/economic development potential of windfall sites can be included in the SHELAA where justified. An updated 'Assessment of Windfall Trends and Potential' <https://www.winchester.gov.uk/assets/attach/28099/Windfall-Assessment-Report.pdf> has been produced as part of the evidence base for the emerging Local Plan. This found that in the period assessed (2012-2019) windfall

sites across the District (excluding the South Downs National Park) averaged over 200 dwellings per annum, considerably higher than estimated in the previous Windfall Study.

- 6.2 Having undertaken a detailed analysis of past windfall trends and likely future delivery, the Assessment concludes that a total windfall allowance for Winchester District (outside the South Downs National Park) of 115 dwellings per annum is justified and robust. This estimate has already been reduced to ensure there is no double counting of sites identified within the SHELAA.

## 7. Stage 4: Assessment review

- 7.1 The information from the SHELAA will form an important part of the evidence base for the new Local Plan, indicating where there are any sites that are available within the settlement boundaries, which could be brought forward for development and other sites which have potential to be allocated to meet future employment, housing, or other needs.
- 7.2 The scale of the housing requirement for the district over the next 20 years will be determined through a standard methodology set by Government – the ‘local housing need assessment’. This ‘local need’ is currently 665 dwellings per annum, although this figure is expected to change before the new Local Plan is finalised. As this is the case the council is currently planning for 700 dwellings per annum. The SHELAA provides a ‘long list’ of potential sites that developers/landowners have put forward for consideration for future development. However, the number of sites that have been put forward in the SHELAA is far in excess of what is likely to be required in the new Local Plan. The Local Plan site selection process and Sustainability Appraisal and Habitats Regulations Assessment will help the council to identify which sites should be allocated for development in the new Local Plan.

## 8. Stage 5: Final Evidence Base

- 8.1 Table 10 below summarises the number of residential dwellings which could be delivered on *all* of the SHELAA sites included in this SHELAA. At this interim stage, the table include those sites which have been deemed unsuitable, as listed in Appendix 5. These figures will be updated once all initial suitability assessments are complete, to remove sites which are deemed unsuitable for development.

**Table 10 Residential Capacity of SHELAA Sites, by parish**

<b>Parish</b>	<b>Theoretical Residential Capacity of SHELAA Sites (no. of dwellings)</b>
Bighton	78
Bishop Sutton	285
Boarhunt	344
Bishops Waltham	4060
Colden Common	1107
Crawley	424

Compton and Shawford	1,267
Curdrige	6,425
Denmead	3669
Durley	4,844
Hursley	2,220
Headbourne Worthy	2,710
Itchen Stoke and Ovington	49
Itchen Valley	195
Kings Worthy	676
Littleton and Harestock	2774
Micheldever	8997
New Alresford	333
Northington	42
Old Alresford	67
Olivers Battery	239
Otterbourne	738
Shedfield	3744
Soberton	27
Sparsholt	188
South Wonston	382
Swanmore	1,689
Southwick and Widley	243
Upham	1050
Whiteley	124
Wickham	3325
Winchester Town	875
Wonston	178

<b>Total</b>	53,363
--------------	--------

8.2 Table 11 below lists the sites submitted to the SHELAA for employment land uses:

<b>Site Reference</b>	<b>Address</b>	<b>Floor Space Proposed</b>
BW25	Land to the rear of Three Oaks Dog Kennels, Botley Road	Up to 1001 - 1500 sqm of floorspace for B1/B8 uses.
CS09	Land at Woodlands Park, Poles Lane, Otterbourne	Up to 390m2 of commercial floor space.
HW06	Meyrick Estates, Down Farm, Headbourne Worthy	Up to 100,000 sqm of commercial floor space.
IS01	Folly Hill Farm, Itchen Stoke	Up to 1000 – 1500 sqm of floor space for B uses.
KW06	Land north of North Winchester Farm	Up to 3000 – 4500 sqm of floorspace for B1/B8 uses.
SH54	Land to the north of Chase Road, Waltham Chase	2001+ sqm of employment floorspace
WIN23	River Park Leisure Centre	
DU23	Land west of Parsonage Lane, nearest postcode: SO32 2AD	2001+ sqm of employment floorspace
DU24	Land North of The Nook, Kytes Lane, Durley, Southampton, SO32 2AE	501 -1000 sqm of employment floorspace
SWA09	Land south of The Lakes, Swanmore	Not specified (part of a mixed use concept)
SWA17	Land at White Cottage, Lower Chase Road, Swanmore	1501 - 2000 sqm (part of a mixed use concept)
SWA19	Oakfields Stables, Forest Road, Swanmore, SO32 2PL	2001+ sqm of floorspace (as part of a mixed use concept)

CC15b	Land Adjoining 85 Church Lane, Colden Common	Up to 1000sqm of employment floorspace
CR05	Arqiva, Crawley Court, Winchester, SO21 2QA	2001m2 or more of employment, 250m2 or less retail, 500m2 or less leisure.
CS10	Land adjacent Bushfield Camp, Badger Farm Road	Not specified (part of a mixed use concept)

## 9. Conclusion

- 9.1 The new Local Plan covers the period from 2019 to 2039 which means that some of the required dwellings for the new Local Plan have already been built or have planning permission.
- 9.2 The initial SHELAA work has indicated that there is a theoretical capacity (if all of the SHELAA came forward) within the district to deliver approximately 53,363 dwellings . Using the Government's standard methodology there is currently a requirement to provide in the region of 665 dwellings per annum (over the plan period this would equate to 14,000 dwellings over a 20 year Plan period) and, whilst this housing figure may change as a result of updates to the input data or Government changes to the standardised methodology, there will only be a requirement to allocate a relatively small fraction of the sites that have been put forward in the SHELAA.
- 9.3 It is important to reiterate that at this stage in the process that any sites which have scored amber and green in the updated SHELAA still require further assessment in respect of their suitability for allocation in the new Local Plan. Any sites identified as suitable for inclusion in the new Local Plan would also need planning permission and their inclusion within this document does not imply either that a site will be allocated in the Local Plan or that permission will be granted. The SHELAA is a list of sites which have been assessed as potentially available, suitable and deliverable, but the document **does not** recommend which sites should be allocated for development in the new Local Plan.

## Monitoring

- 9.5 Housing land availability information will be monitored annually through the Authorities' Monitoring Report. There will be another Call for Sites at later stage (Regulation 18) if considered necessary, in which case the SHELAA will need to be updated at this stage of the process.

**APPENDIX A:**

**SITE MAPS AND INITIAL ASSESSMENT SUMMARIES – SEE SEPARATE PDF MAPS**

**APPENDIX B:**  
**SCHEDULE OF SMALL SITES <1HA**

Paragraph 69 of the NPPF expressly recognises the role that small and medium sized sites can play in meeting housing requirements. Local authorities are required to identify (through the Local Plan and brownfield registers) land to accommodate at least 10% of their housing requirement on sites no larger than one hectare, unless it can be shown there are strong reasons why this target cannot be achieved.

<b>Parish</b>	<b>Site Reference No.</b>	<b>Name</b>	<b>Site Area (hectares)</b>	<b>Capacity (no. Dwellings)</b>
Bighton	BI01	Gaywood, Bighton Lane, Gundleton	0.85	23
