- Appellant
- Agent
- Interested Party / Person
- Land Owner
- Rule 6 (6)

What kind of representation are you making?

- Final Comments
- Proof of Evidence
- Statement
- Statement of Common Ground
- Interested Party/Person Correspondence
- Other

YOUR COMMENTS ON THE CASE

The land at the back has always been agricultural and sits right next to Biggs copse which had to have a TPO placed on the woodland to stop further destruction to the trees which had taken place, all owned by the same land owner so clearly has no regard to the wildlife which has been disturbed. badgers have their setts in there and many protected animals have their homes in there.

Why does the land need to be raised, this is a worry as i believe rubble has been dumped causing the land to be higher killing trees and disturbing the natural flow of the country side, raising the land could cause flooding in the area around even into the protected wood if the land is higher, i think it should be investigated why the land already is higher creating uneven grounds and walls.

since this area has been used and the noise rips through many homes who live close by including minw where the noise is intolerable. allowing a change of use of land opens a can of worms for the rest of the land to follow suit and turn the site into an even bigger industrial site. it sits in the middle of a residential area in the country side. trees are clearly dying in the location which the appeal is on , when will someone open their eyes to the loss of trees on this site, for the benefit of further business to grow here all which are noisy, changing the use of land is a recipe for disaster as it was giving permits by the EA to this site with little or no regard to the environment. the site should be looked at as a whole not parcels of land, storage USE will turn into other business and further growth of a site which creates hideous noises,

PLEASE REVERT IT ALL BACK TO COUNTRYSIDE .
