
High Quality Places SPD

Simon Maggs comments

Suggest this has creation of sustainable, inclusive and mixed communities as an urban design principle. There is good reference in section five to interaction and sense of community, however the document needs to be stronger in picking up on the sorts of issue noted above in relation to LP2.

I suggest reference is made to the HARAH Rural Design Guide in the relevant part of the SPD. In the section on private amenity space, particularly where garden space is restricted, useable balconies should be included (e.g. capable of accommodating table/chairs).
