Proposal: G1: 3x Birch fell to ground level. The trees are in very close proximity to the building, and also leave a large amount of debris on the bowling club's facilities, as well as contributing to the heavy shading on the grass, which limits the growth of the grass. (An important factor for the bowling club.)

T1: Western Red Cedar: Reduce by up to 6-7m in height, so as to limit the shading produced by the tree over the grass area, and encourage better growth of grass rather than moss.

T2: Willow: Fell to ground level due to shading, and debris over grass area and encroachment over boundary line as with the other trees.
