Applicant: Mr Craig Thomas

Proposal: TPO ref 1208 - Fell and treat with eco plugs to one Oak tree (T8.) The tree works are proposed as a remedy to the differential foundation movement at the insured property and to ensure the long-term stability of the building. To limit the extent and need for engineering repair works at the insured property, and need for costly CO2e emissions relating to alternative engineering repair works at the insured property. To limit the duration of any claim period and therefore allow the landowner their right to the peaceful enjoyment of their property. An alternative to felling would not provide a reliable or sustainable remedy to the subsidence in this case. (See original application)

Applicant:
Proposal: the lime, tree 22 in attached report from 21st April 2022, has significantly altered. The north side now sounds decayed in the sapwood. The east (compression) side sounds normal. The south side remains decayed. The west (tension) side now sounds decayed in the sapwood. Due to the use of the site and the adjacent highway to the east, I recommend that the tree is felled as a high priority (to be complete within 1 month if feasible subject to highways and contractor availability). Due to the extent of decay, I do not believe that there would be any significant sufficient remaining material for a reduction or pollard. Tree to be felled to 3m stump (Amended)
