

FOI REF:	14562
RESPONSE SENT:	27/08/2024

Request:

Hi there,

I would like to submit a FOI Act 2000 to the council. Please would you share your responses, where available, to the following questions:

What is your current energy management software solution?

Who is the provider for this current solution?

What is the current contract cost annually? What was the cost to implement?

When did this contract begin, and what is the date for renewal?

Are there any exit fees for this contract renewal?

Response:

Winchester City Council's energy management software is Systems Link Energy Manager.

The software is provided by SystemsLink.

The annual cost of the software is £6,834 including VAT. There was no direct implementation cost, but there was time involved in setting up the software.

The current contract with Systems Link begun 1st August 2024. We have been using this software for a number of years. The renewal date is 31st July 2025.

There are no exit fees surrounding this renewal.
