

Appendix Two

Schedule of 'Good' Urban Capacity Sites in Winchester District

Note:

This schedule is a list of 'good' urban capacity sites in Winchester District which were identified through a comprehensive survey of the District between May and August 2000 as set out in the main document. It includes the outstanding planning permissions (where there was a net gain of dwellings) on small residential sites in the defined built up areas as at April 2000. These sites are indicated in the schedule as having planning permission with the date of permission and the application number provided.

Every site has been given a unique ID number. These ID numbers listed in this schedule can be used to locate the sites on Maps in Appendix 3. This is a working schedule that will be used in monitoring and regularly updated. The schedule also provides an estimate of the number of dwellings for each site. This estimate was derived using the methodology set out in the main document and should not prejudice the decision on any planning application for sites included in the schedule.

Because of the difficulty of identifying some of the site owners and the large number of sites involved - about 500 - the Council has not been able to notify individual owners/occupiers of sites which have been included in the Study. We recognise that developers wishing to buy property for development may inevitably approach some owners of these sites. We ask that developers are sensitive and respect the privacy of the residents. While encouraging the sites being brought forward for development, the Council emphasises that it is for land owners to decide whether they wish to do this. Developers cannot force a landowner to sell land and do not have the power to buy sites by compulsory purchase. As the Council is not allowed to advise owners on land values, any owner considering selling their land for development should seek professional advice.

The Urban Capacity Study only identifies the good development opportunities, but other sites suitable for development will emerge. The Council will not assume that the sites included in the Urban Capacity Study are the only ones that will be developed in the Local Plan period, or that these sites will always prove suitable for development once detailed site analysis is carried out. Planning permission will still have to be obtained for development, even if sites are included in the Urban Capacity Study.
