Case Officer: John Bartlett

Proposal: T1 - Horse Chestnut

North, East, South and West sides of the canopy to reduce all sides by up to 3m, several limbs over-extended on the North, East, South and West sides to sympathetically balance by reducing no greater than 3m in length with a finished width from the main stem at 6m, stem diameter cuts no greater than 35mm. Blend the height by reducing in height by no more than 3m.

Crown lift secondary and tertiary branch foliage 6m from ground level.

Works to be carried out in accordance with BS3998(2010), nearest best practice pruning.

Diagram attached for example purposes.

Reason: The tree is now dominating the garden space; the branch foliage has significantly grown over the children's garden area below; the branch foliage is heavily weighted over the driveway and smaller structures; the lower branches are a nuisance to high sided vehicles. Requesting a sympathetic prune to allow the tree to keep its form without pruning back too hard.

Low amenity Value due to the property being at the end of an unmade private track with one neighbour that would suffer more of an impediment from lack of sun light it causes.
