

FOI REF:	15360
RESPONSE SENT:	24/03/2025

## Request

This is an information request relating to the purchasing of heat pumps to be installed in council owned social housing.

Please include the following information for the following years, 2021/22, 2022/23 and 2023/24:

1. Whether any heat pumps have been purchased and/or installed by the council in any council owned social housing.
2. The cost of each heat pump purchased and/or installed in any council owned social housing.
3. Whether any estimate has been made of long-term savings as a result of installing heat pumps, and what these savings are estimated to be in any council owned social housing.

## Response

1. Whether any heat pumps have been purchased and/or installed by the council in any council owned social housing.

2021 to 22 - 14 ashp fitted

2022 to 23 - 15 ashp fitted

2023 to 24 - 17 ashp fitted

2. The cost of each heat pump purchased and/or installed in any council owned social housing.

Cost ranges from £8000-£13000 as work is varied in each

3. Whether any estimate has been made of long-term savings as a result of installing heat pumps, and what these savings are estimated to be in any council owned social housing.

No estimate has been calculated because the Council are not installing heat pumps on mass to all of it's housing stock. There is a programme to install Heat pumps to some Electric Properties but no proposal to install across all houses. This is due to the Tarriff differences between Gas and Electricity and the prevention of Fuel Poverty.
